DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7 and claims 8-13, drawn to a fuel cell output characteristic estimating apparatus and a fuel cell system, classified in class 429, subclass 23.
 - II. Claims 14-17, drawn to a vehicle comprising a fuel cell system, classified in class 180, subclass 65.3.
 - III. Claims 18-22 and claims 23-28, drawn to a method of estimating output characteristic of fuel cell and drawn to a method of controlling output of fuel cell, classified in class 702, subclass 183.
 - IV. Claims 29-39, drawn to a data storage medium that stores a computer readable program, classified in class 702, subclass 183.
2. Inventions I and II and IV are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions I and IV are unrelated because the fuel cell system does not have to have a data storage medium that stores a computer readable program; additionally, the vehicle does not have to have a data storage medium that stores a computer readable program.

Art Unit: 1745

3. Inventions I and III are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the method of estimating output characteristic of fuel cell and method of controlling output of fuel cell can be practiced by another apparatus, having a materially different structure.

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Mr. Robert Post on July 23, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).
